## SUMMARY

Full-Stack AI Developer & Biochemist. I design modular systems, direct agentic workflows, and build production-grade web applications. With a solid foundation in computational life sciences, I specialize in integrating LLMs, deterministic APIs, and complex data pipelines into clean, scalable software interfaces.

## EXPERIENCE

- AI Front-end Engineer | Flyrank AI07/2026 - 10/2026
  - Architected user-facing interfaces and integrated deterministic AI guardrails, wrapping non-deterministic LLMs in strict schemas to eliminate runtime errors.
- Drug Discovery Simulation Analyst | LifeArc Biology Research Job Simulation01/2026 - 02/2026
  - Ranked and filtered drug candidates using multi-parameter analysis frameworks in simulated research pipelines.
- IT Infrastructure Intern | Dejavu Technologies07/2024 - 12/2024
  - Resolved multi-site hardware/software issues and managed network topology to improve infrastructure stability.

## SELECTED TECHNICAL PROJECTS

- Bio-Dock
  - Architected a full-stack bioinformatics platform (Next.js, Python) for molecular docking and WebGL 3D visualization, integrating the Gemini API to analyze computational outputs and accelerate pathogen target screening.
- Post-Matic
  - Developed an automated web application leveraging LLM workflows and custom API pipelines for end-to-end content generation and publishing.

## EDUCATION

Biochemistry & Molecular Biology  
University of Nairobi - B.Sc (Graduating 2026)

## CERTIFICATES

- AI Technical Foundation  
Qualcomm Academy Anthropic
- Introduction to Programming  
Saylor Academy
- Introduction to Artificial Intelligence  
Simplilearn SkillUp
- Certified AI & Claude Specialist  
Anthropic Academy

## SKILLS

- Full-Stack & Cloud: Python, JavaScript, Node.js, Next.js, React, Tailwind CSS, REST APIs, Databases, Git/GitHub, Render, Vercel/Deployment.
- AI & Architecture: LLM Integration, Agentic Engineering (Claude, Codex, Copilot), Prompt Engineering, Data Pipelines, Modular System Design.
- Domain Tooling: Bioinformatics Pipelines, Computational Life Sciences, Molecular Docking, Quantitative Modeling.

## LANGUAGES

- English
- Swahili
- Chinese – basic
